

DEV/SECOPS BOOTCAMP

BUILDING RUGGED SOFTWARE

YEAR ONE / WEEK ONE / LESSON THREE

Team Principles

- DevSecOps is a team sport
- High performing organization
- Take responsibility, give credit
- Feedback is a gift!
- Fail fast
- No excuses

The Rules

DOs:

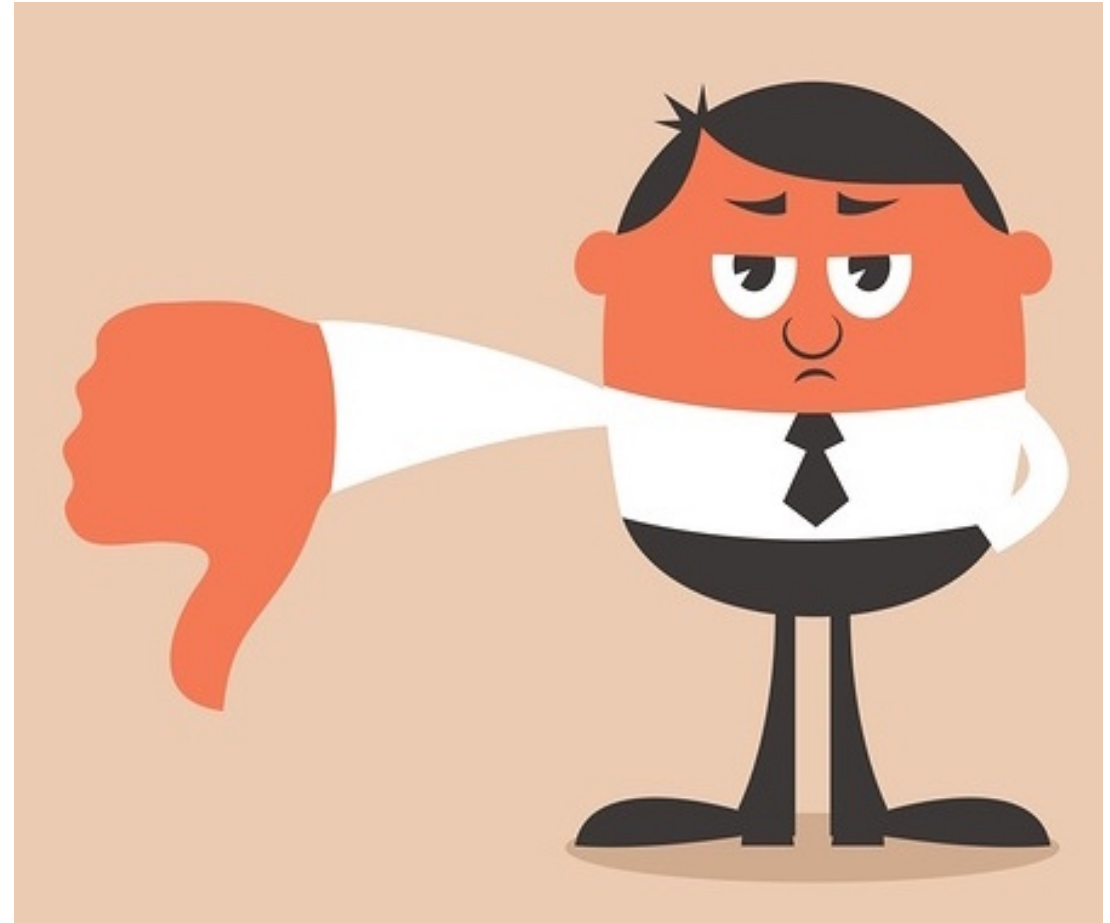

- **DO** ask for help
- **DO** ask your team first
- **DO** escalate as necessary
- **DO** ask questions

The Rules

DONTs:

- Do **NOT** fail silently or fail for too long.
- Do **NOT** be afraid to make mistakes.
- Do **NOT** be afraid to ask questions.

Environment Set Up

- During this bootcamp we will be using some of the following technologies

Installing Needed Software

- Our lab environment for the next couple of weeks will be a virtual machine provisioned using Vagrant.
- The VM already has Ruby and the AWS CLI installed on it.
- We will be updating the Vagrant file each week to add more functionality to the VM.

Lab 3

- <https://github.com/devsecops/bootcamp/blob/master/Week-1/labs/LAB-3.md>

Next Week

DEV/SECOPS BOOTCAMP

Intro to DevSecOps Development
